ABOUT ME

“Customer-focused and passionate web Engineer with 12+ years of experience specializing in client-side web technologies such as JavaScript, HTML, and CSS, yet very adept at server-side programming having enterprise experience with JSP. Highly skilled in UI development for Single Page web applications, from concept to implementation. Well-versed in site-speed techniques & performance optimizations, frontend architecture, client-side templating, maintainability and scalability.”

PROFESSIONAL EXPERIENCE

- Oracle**
Principal Member of Technical Staff
Mar 2015
Working on designing and architecting the framework for database service dashboard for ACS Project. I am building this Single Page Application with Knockout, Sammy & require JS. Also using gridstack as a third party library to implement grid layout. More Info [here](#).
- eBay Inc.**
Senior Front End Engineer
Nov 2011 – Feb 2015
Keeping company goal of Mobile and Desktop, designed, architect and build shopping cart at eBay. Converted cart in multi-language, including DE, IT, ES, US, UK, FR using eBay in-house Raptor platform. Redesigning shopping cart UI as per eBay DS4 standards keeping customers main pain points and with improved design. More Info [here](#).
- Bank of America**
Senior Web Application Developer
JUL 2005 – Nov 2011
Front End Development utilizing HTML, CSS3, and jQuery leveraging in-House Borneo framework. Designed and developed the screens for Mobile Banking and Desktop Banking Including Banking Center Enrollment. More Info [here](#).
